

FileTally

Count the folder. Check the details.

Local document counting for Windows, Mac, iPad and iPhone

Platform availability

Windows	Available now - Windows 10 and 11, 64-bit
Mac	Coming soon - native macOS app
iPad	Coming soon - native iPadOS app
iPhone	Coming soon - native iOS app

Current Windows edition

Count mixed files

PDF, Word, Excel, PowerPoint, multi-page TIFF, images, email and text. Supported ZIP archives are extracted locally.

Review the coverage

Exact counts, estimates and exceptions stay visible. Office automation supplies layout-based counts when installed, with labeled fallbacks. Excel printed pages follow its layout; a worksheet fallback is an estimate. Cells are never pages.

Save the result

Export a per-file inventory as CSV or XLSX, or save a printable PDF summary. Source documents are read without modification.

Keep document processing local

Document content is not uploaded for counting. No account is needed. Licensing uses online activation and lease renewal, with offline grace.

Windows purchase

Seven-day full-feature trial. Solo: \$24.99 once, one seat, with twelve months of updates. Apple requirements, features and purchase terms will be published with each release.
